

## Industry Workshop

The workshop will bring together relevant stakeholders at industry level and representatives of neighboring EU projects to explore and discuss the latest achievements made towards the demonstration of innovative, competitive toolsets for the exploration of buried LCT and NYF pegmatites, including three new instrumental techniques and devices: piezoelectric sensor, helicopter-complementary nose stinger magnetometer, drone-borne hyperspectral imaging system, and two new datasets for prospect scale (<50 km<sup>2</sup>) and district scale (50-500 km<sup>2</sup>) exploration.
